

Contractor Experience

2024-09-27

- Let n_i^{task} = Number of projects of the same task held by the contractor in the three quarters before starting project i
- Let n_i = Number of projects held by the contractor in the three quarters before starting project i
- Define:
 - Inexperienced contractor $_i$ = 1 if $n_i^{task} = 0$
 - New entrant $_i$ = 1 if $n_i = 0$
 - Level of inexperience $_i = 1 - \frac{n_i^{task}}{n_i}$ if $n_i > 0$
 - Level of inexperience $_i = 1$ if $n_{i,k,t} = 0$.
