

Congestion – Restrict to competitively awarded projects

2025-10-30

- $Treat_i = 1$ for contractors that hold at least one small project over the sample horizon.
- $Treat_i = 0$ for contractors that hold only large projects.
- For treated group, focus only on new projects/budget/etc. acquired for small projects.
- For the control group, by construction, changes will account for new projects/tasks/budget acquired for large projects

Table 1: Congestion and the QuickPay reform

	$NumProjects_{kt}$		$TotalBudget_{kt}$ (millions)		$NumTasks_{kt}$		$TaskPermanence_{kt}$	
	I	II	III	IV	V	VI	VII	VIII
Constant	5.15*** (0.44)		4.11*** (0.57)		1.43*** (0.02)		0.87*** (0.00)	
$Treat_k$	-1.02** (0.47)	-1.01** (0.47)	-2.86*** (0.58)	-2.84*** (0.58)	-0.02 (0.03)	-0.02 (0.03)	-0.05*** (0.01)	-0.05*** (0.01)

Clustered (Contractor) standard-errors in parentheses

Signif. Codes: ***: 0.01, **: 0.05, *: 0.1

Sample restricted to competitively awarded projects. Treat is an indicator that equals one for contractors that hold at least one small project during the observation horizon. Control group constitutes contractors who hold only large projects during the observation horizon.

Table 2: Congestion and the QuickPay reform

	$NumProjects_{kt}$			$TotalBudget_{kt}$ (millions)			$NumTasks_{kt}$			$TaskPermanence_{kt}$
